1 | Revision History

Version	Date	Revision
0.1	10.16.2019	Initial version
1.0	10.16.2019	Internal review and approval

2 | Management Summary

The Berlin Group will soon publish the BG XS2A Extended IG Additional Information specification. Based on this specification, we will supply the account holder name in the "Account Details" structure.

3 | Affected Endpoints

Currently the "Account Details" structure is supplied in the following endpoints:

- GET /v1/accounts {query-parameters}
- GET /v1/accounts/{account-id} {query-parameters}

4 | Structural Adjustments

The structure described in Chapter 14.18 Account Details in 03. NextGenPSD2 Access to Account Interoperability Framework - Implementation Guidelines V1.3.4 is changing as follows:

A new attribute called `ownerName` will be supplied. The new attribute is added after "currency" and before "name".

...

<i>currency</i>	<i>Currency Code</i>	<i>Mandatory</i>	<i>Account currency</i>
<code>ownerName</code>	<code>Max70Text</code>	<code>Optional</code>	<p>Name of the legal account owner. If there is more than one owner, then multiple names might be noted here.</p> <p>For a corporate account, the corporate name is used for this attribute.</p> <p>Even if supported by the ASPSP, the provision of this field might depend on the fact whether the PSU coincides with the account owner and/or whether an explicit consent to this specific additional account information has been given by the PSU.</p>
<code>name</code>	<code>Max35Text</code>	<code>Optional</code>	<i>Name of the account given by the bank or the PSU in online banking</i>

...

5 | Consent Permissions

Additional permissions on the consent are not required to retrieve the account owner name. The information is always supplied.
